

Cooking with the Sun: The Art and Science of Solar Cookers

Saturday, March 15, 1:00-3:00 p.m.

Mesa Urban Garden, 212 E. 1st Ave.

Note: In event of rain, the program will take place at Mesa Main Library.

Course Description

If you're interested in cooking using the free energy of the sun, or making delicious meals in the summer without heating up the kitchen, here's your chance to learn all about solar cooking. Presenter, Merry Bevill, will discuss the art and science of cooking as well as demonstrate her favorite solar ovens and cooking techniques.

No registration is necessary and the class is free! Call (480) 644-4400 for more information.

Speaker Bio—Merry Bevill

Merry is an avid solar cooker enthusiast. She first became interested in solar cooking in 2008. After testing the theory with a homemade solar funnel made from a windshield shade, she invested in her first solar oven. She now owns 8 solar cookers, including 2 homemade ovens given to her by a friend. Her blog "Adventure In Solar Cooking" shows how to convert conventional recipes to solar recipes. She loves to share her passion, and has given presentations to scout groups, to women's clubs, and at cooking demonstrations.
